

Dr. Shabahang received his DDS from the University of Pacific in 1987 and his Certificate in Endodontics and MS from Loma Linda University (LLU) in 1997.

In 2001, he completed his PhD in Microbiology and Molecular Genetics at LLU.

During his tenure on the faculty of LLU, he established and maintained his laboratory focusing his research on host-pathogen interactions while working with a team of researchers on development of novel therapeutic products.

Dr. Shabahang is currently the Chief Innovation Officer at Aditxt, Inc. developing innovative technologies in immune mapping and reprogramming.
